

The ODD Number Song

by Kathleen Wiley

I need to find the ODD number, and so I look to the right
And when I find the ODD number, it will be 1, 3, 5, 7, or 9

RAP:

**The odd numbers we know are 1, 3, 5, 7, 9,
Each time we see them we think they are fine
So 21, 43, 65, 89 all are odd caused by the number on the right**

**The farthest right number's the one that we notice
The others don't matter, so don't get uptight!!
2, 4, 6, 8 can all be to the left.
The deciding number's on the farthest right**

**So 24,681 is an odd number because of the one
86,425 is an odd number because of the five
42,683 is an odd number because of the three
68,429 is an odd number because of the nine**

**And so it goes on forever and ever.
We look to the number that is on the right
So let's sing our song again and again and we'll remember
'Cause odd numbers are 1, 3, 5, 7, 9**

I need to find the ODD number, and so I look to the right
And when I find the ODD number, it will be 1, 3, 5, 7, or 9
