

Busy Bodies

CHORUS

*I'm a busy body, if you know what I mean,
A fine-tuned, moving, thinking machine;
From my awesome brain to my great big heart,
I'm a walking, talking work of art!
(I'm a walking, talking work of art!)*

VERSE 1

The Respiratory System on our lungs it depends;
Breathing in and breathing out, it never ends.
There's no doubt about it, we can't live without it!
Respect the gift of life and treat it well my friends.

VERSE 2

Well the Circulatory System pumps our fresh blood around.
The heart does this, with any blood there to be found.
There's no doubt about it, we can't live without it!
It's working 'round the clock to keep us safe and sound.

CHORUS

VERSE 3

All the parts of the Digestive System cooperate,
Taking food in, helping to eliminate.
There's no doubt about it, we can't live without it!
So choose what you put in it, keep it in top shape!

VERSE 4

The Skeletal System's where our bones and muscles are found,
Helping us to stay upright and move around.
Make no bones about it, we can't live without it!
It saves us making constant contact with the ground!!

CHORUS

VERSE 5

Now, the Nervous System, is the centre for all commands
Reading our emotions, actions and demands.
There's no doubt about it, we can't live without it!
Forever wired to pick up signals and alarms.

VERSE 6

Now, the Human Body Systems, there are more than a few,
Busy working night and day, for me and you.
There's no doubt about them, we can't live without them!
So don't take them for granted, think before you do!

CHORUS
