

18. THE WATER CYCLE

("My Darlin' Clementine")

Evaporation (Push palms up.)

Condensation (Hands together in air.)

Precipitation all around (Wiggle fingers down.)

Accumulation (Sweep arms in circle.)

Evaporation (Push palms up.)

The water cycle goes

Round and round (Make circles with arms.)

Activities: Make "rain" by putting filling a large glass jar with hot water. Place a pie pan full of ice cubes on top. Observe as the water condenses and then appears to "rain" in the bottle.

Brainstorm why we need rain.

Make a book called "What to Do on a Rainy Day!"
