

# Transportation

## **Chorus**

*Transportation, transportation,  
Keeping things moving right across our nation;  
From depots, wharves and airports, to the railway stations,  
Wherever would we be without transportation?!*

## **Verse 1**

How do we move ourselves from one place to another,  
When we all want to travel from there to here?  
We move our legs, we put one foot before the other,  
Getting us to many places far and near.

## **Chorus**

## **Verse 2**

Somebody long ago, came up with an idea;  
The wheel became his wonderful invention!  
When it rolled out he said, "Well, what do we have here?!"  
Making life much easier was his intention.

## **Chorus**

## **Verse 3**

Cars, bikes and buses help, take us from home to school  
And food trucks go to far off destinations.  
Ferries and planes take us to places really cool;  
None of this would happen without transportation!

## **Chorus**

## **Verse 4**

Transport is what we need, when we get out of bed,  
No matter what we're planning to do that day.  
Pedestrian, equestrian, the skateboard in the shed;  
Whatever you choose, they'll help you on your way. YAY!

## **Chorus**

## **Verse 5**

So many people help to make these systems work,  
From passengers who follow the rules and signs;  
Hardworking cleaners to the friendly railway clerks,  
Officers all checking cars are moved on time.

## **Chorus**
