

Children All Over The World

**Children all over the world are singing just like me (2x)
Now the words might be different and the language is strange
But it all comes out the same
Children all over the world are singing just like me**

**Children all over the world are laughing just like me (2x)
They might laugh at a joke or a funny face
Or something on a TV show
Children all over the world are laughing just like me**

**Children all over the world are learning just like me (2x)
Learning how to read, how to write and how to count
Learning as much as they can
Children all over the world are learning just like me**

**Children all over the world are growing just like me (2x)
Growing in Russia, France and Japan
Growing in Africa, too
Children all over the world are growing just like me**

**Children all over the world are playing just like me (2x)
Playing with their friends or by themselves
Playing 'til it's time for bed
Children all over the world are playing just like me**

Repeat first verse
